

Raw Honey
Directly From Beehives
To your Table

Catalogue

Who we are ?

We, Abhay Mane, Sanket Vathare and Shrivardhan Joshi, the founders of FARMBUDDY NATURALS brand, a while ago, were unhappy with the fact that most of the commercial honey available in the market was extremely processed and pasteurized and never felt genuine and natural. That's where our Journey began and we decided to get away from our Engineering backgrounds and plunge into this beautiful and sweet world of Honey Bees and decided to bring the most natural form of Honey, RAW and UNPROCESSED HONEY under our Brand "FARMBUDDY NATURALS", directly from the Hives to The Table.

We are Bee Keepers, Yes We are, and we take the Pride in Keeping our Honey Bees absolutely safe and away from any type of disease and feeding them with their own food, HONEY, rather than sugar syrup which is a practice followed by most.

We are also proud of presenting absolutely Raw and Unprocessed Honey, to our valuable Customers, from variety of flora available from all parts of India, right from Maharashtra, where we collect our most valuable Raw Forest Honey to Himalayas where Raw Eucalyptus Honey is collected to Rajasthan for Raw Ajwain and many more.

Why choose Farmbuddy ?

We strive hard to keep our Bees and our Customers safe by following extremely stringent extraction practices and our Raw Honey comes directly from our Hives to the Table with no processing at all. The non-processing makes sure that the Honey has all the anti-biotic, anti-oxidant properties and all the nutritional values which Honey is supposed to provide.

What We Do ?

We, under our Brand "FARMBUDDY NATURALS", supply Unprocessed and Raw Forest, Ajwain, Sunflower, Eucalyptus, Tulsi and Jamun Honey to Customers all around the world right from USA to UAE. And with the ever increasing demand from our Customers, we are gearing up to increase our volumes to meet the demand and expand our products to other Raw varieties.

Natural Benefits of Raw Honey

Raw Honey has its own uniqueness that makes it delicious and tempting.

The smooth consistency and alluring taste will leave you craving for more.

Since ages, Raw, unprocessed and unpasteurized Honey has been used as a folk remedy as it has a variety of Health benefits.

Raw Honey benefits:

- An Overall winner:

Raw and unprocessed Honey is rich in essential minerals, Amino acids, and contains wide range of enzymes and vitamins

- Rich source of pollen -

Raw and Unprocessed Honey contains right amounts of pollen grains which have nutritional enzymes that help in digestion and strengthening your immune system

- A Good source of Antioxidants –

Raw Honey is a good source of Antioxidants that protect your body from cell damage due to free radicals. Antioxidants, such as phytonutrients, which are prevalent in Raw honey, have shown immune boosting characteristics

- Antibacterial and Antifungal properties –

Research has shown that raw honey can kill unwanted bacteria and fungus. It naturally contains hydrogen peroxide which is an antiseptic

- A Potent Probiotic –

As per experts, Raw Honey is a potent probiotic which nourishes the good bacteria that live in intestines which are crucial not only for digestion but overall health.

Raw Forest Honey

Collected from the famous Forests of Western India, our Raw Forest Honey is smooth, thick and full of Fun and Nutrition. Collected from the wild local flora available in the Dajipur forests, our Raw Forest Honey is one of its kinds and is exclusive and rare.
